

# 190-1A - The American Count Wheel Striking Clock

**Two day workshop, movement  
and specialized clock tools supplied**

*Register early...this workshop is sure to fill quickly!*

**May 6th and 7th, 2017**

**Santa Paula Odd Fellows Lodge**

868 Main Street, Santa Paula, CA.

- We will furnish an open frame, count wheel, time and strike movement for you to use in this workshop.
- We will also provide all specialized clock repair tools required such as; spring winders, let-down keys, etc.
- You may bring your own hand tools if you want, such as tweezers, needle nose pliers, nut drivers, etc.
- You should bring some form of magnification such as; eye loupe, clip on loupe, optivisor, etc.
- You will learn how the count wheel controls the strike hammer on the hour and half hour.
- You will completely disassemble and reassemble the entire clock including the mainsprings.
- You will learn how to make adjustments to the strike train to make it run properly, if required.
- You will understand how the most popular, and reliable American style movement operates.

**Tuition \$200.00 - Payable to NAWCC Chapter 190**  
*Limited class size. First come, first served.*

*Place reserved by date pre-payment received.*
